Ok thanks - I was trying to get a hold of Amber because I'm still a bit confused about this sentence:

Whether use of a pesticide on a seed crop was assessed and determined to meet the standard for registration under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and therefore registered for that use is one factor considered in determining whether the regulatory exemption at 40 CFR section 152.25(a) applies to a particular pesticide-treated seed product.
